No Peeking Anymore!

No peeking devices and playing card designs discussed.

No Peek

Tech Art II

The Devices

NoPeek 21 – Laughlin, Nevada

Illuminating Blackjack Security, Speed, & Accuracy!

Our Blackjack playing card reader makes gaming quicker and easier than ever!

There are NO buttons to push or annoying mirrors to squint at.

Complete elimination of "DISAPPOINTMENT" Blackjack.

The dealer doesn't peek at the hole card or wait until the end of the game to determine a 21 hand.

ALL card companies carry the No Peek 21 card. (Jumbo size too!)

Tech Art – Las Vegas, Nevada

Tech Art, Inc.

Tech Art MAXTime®

Tech Art introduced this revolutionary patented device to the game of 21 in 1990 as a response to the "No Peek" rule adopted by most casinos in order to prevent dealer tells and signaling.

MAXTime® is virtually foolproof, 100 percent accurate, has no moving parts, needs no power source and allows the dealer to determine whether or not the value of the hole card produces blackjack.

Competing products require a power source, have statistically significant occurrences of malfunction and misreads and involve significant down time for repair. MAXTime® outperforms the competition in terms of simplicity, efficiency, durability, accuracy and cost.

The Cards

There are 3 styles of cards made for the No Peeking Devices and the cards are made in standard or jumbo Index. The 3 styles are No Peek, TechArt and TechArt II. The cards are easily identifiable once you know what to look for. I did find one variant of the TechArt card design that was made for Casino Windsor.

No Peek

No Peek Standard

The No Peek cards are easily noticed because of their hexagon shaped black markings in the top left corner of the Ace and the top right corner of the face card.

No Peek Jumbo

No Peek Jumbo cards have the same hexagon markings as the standard cards.

TechArt

TechArt Standard

The TechArt card is easily spotted with 4 pips for the Ace and the pip on the top right corner is higher than the pip on the top left corner. Face cards usually have a pip at a 90 degree angle above the regular pip.

TechArt Jumbo

The TechArt jumbo card is easily spotted with 4 pips for the Ace and the pip on the top right corner is higher than the pip on the top left corner. You would not be able to tell the difference between a TechArt jumbo face card and a TechArtll face card.

TechArt Variant (Casino Windsor)

The TechArt card is easily spotted with 4 pips for the Ace and the pip on the top right corner is higher than the pip on the top left corner. The face card has a logo above the pip instead of the extra pip at a 90 degree angle.

TechArt II

TechArt II Standard

The TechArt II card is easily spotted with a logo or design on the top right hand corner of the Ace. The face cards have no additional markings.

TechArt II Jumbo

The TechArt II card is easily spotted with a logo or design on the top right hand corner of the Ace. The face cards have no additional markings.

My personal testimonial....

OpenOffice 1.1.1 is used to design this newsletter. OpenOffice.org offers free Office Suite Software that can compete with Microsoft products. All OpenOffice products can open Microsoft Office files. OpenOffice.org is a volunteer community of software developers determined to offer the best Office Suite software available. Available for Windows, Linux, MacOSX. OpenOffice 1.1.1 is available for FREE at www.openoffice.org
